

# LEONARDO DA VINCI (1452-1519) | 500<sup>th</sup> Anniversary |

---

*"When genius takes control over ego, Leonardo da Vinci happens..."*

**Leonardo da Vinci** was born in Anchiano, Vinci (Italy) on **April 14<sup>th</sup>, 1452** (and not April 15<sup>th</sup>, as usually published; for more details on this please check the site [https://trans4mind.com/personal\\_development/astrology/Calculations/daVinci.htm](https://trans4mind.com/personal_development/astrology/Calculations/daVinci.htm)); and died on **May 2<sup>nd</sup>, 1519** in Amboise (France). And for 67 years, he seemed to have lived seven lives, or more, all in just one...

Today, we honor his genius by celebrating the 500<sup>th</sup> anniversary since his death.

It is commonly said that he was 500 years ahead of his time, so... I guess the question now would be *"Are we finally ready today to value his legacy, and fully understand the clues he left us on how to have a simple, curious, humble and universal vision of life itself, and become a Genius because of that?..."*

Because of **Leonardo da Vinci**, the most famous Genius and Polymath of all times, we are also celebrating today the genius in all of us – that spark of Universal Intelligence within ourselves, just waiting to be free...

By transcending his own ego, the human being can achieve highly standards of excellence. **Leonardo** did it, what about us?...
